SUMMARY

Experienced Backend Developer with 5 years of experience in software development, web services, and cloud computing. Strong understanding of data structures, algorithms, and design patterns. Proven ability to design, develop, and implement high-performance applications. Seeking a position at LI.FI to leverage my skills in backend development.

EXPERIENCE

Backend Developer
LI.FI   **Remote**
· Kenntnisse: ethers.js · Web3 · Grafana · Jest · MongoDB · GraphQL · Express.js · TypeScript · Blockchain

Freelance Work
Boehler IT Solutions   **Juni 2021–Juli 2023 · 2 Jahre 2 Monate**
· Continued work with Remotly GmbH as one of many freelance clients

Full Stack Developer
Boehler IT Solutions   **Jan. 2020–Jan. 2022 · 2 Jahre 1 Monat**
· Developing and selling different SAAS solutions.
· Supreme Bot: ecommerce automation software, never miss online restocks of hyped products and make sure to get your favourite items at release. Build by reverse engineering websites and anti botting scripts, finding API endpoints for automatisation done with requests or tools like puppeteer and selenium.
· Discord Bots: Integrated payment services (stripe, paypal, ...) to sell spots in your discord server, web UI for users to login with discord oAuth to manage subscription and payment details

Backend Developer
remotly GmbH   **Remote**
· I was responsible for creating automation scripts for repetitive tasks using NodeJS, official REST APIs, or creating inofficial APIs for intern use. I've deployed, hosted, and maintained those tools.
· Additionally, I took care of email address creation for employees and worked with salesforce and google cloud.

PROJECTS

Supreme Bot - Web scraping
Mai 2018–Dez. 2020
· Assoziiert mit Boehler IT Solutions

Algorithm crypto trading
January. 2020–Heute
· Assoziiert mit Boehler IT Solutions

CERTIFICATIONS

Developing Cloud Native Applications
IBM · 2022

SKILLS

Alle: ethers.js, Web3, Grafana, Jest, MongoDB, GraphQL, Node.js, Express.js, TensorFlow, Webanwendungen, Ionic, Web Crawling, Maschinelles Lernen, Google Data Studio, Algorithmischer Handel, E-Mail-Systeme, Reverse Engineering, Kryptowährung, Automatisierter Handel, iOS-Entwicklung

Branchenwissen: Web3, Express.js, Webanwendungen, Web Crawling, Maschinelles Lernen, Algorithmischer Handel, E-Mail-Systeme, Reverse Engineering, Kryptowährung, Automatisierter Handel, iOS-Entwicklung, Technische Analyse, Derivatehandel, WebSocket, TypeScript, Backend-Entwicklung, Webhosting, Webanwendungsentwicklung, NFT, CI/CD

Tools & Technologien: Grafana, Jest, MongoDB, GraphQL, Node.js, TensorFlow, Ionic, Google Data Studio, MySQL, React.js, React Native, JavaScript, Shopify, REST-API, OAuth, JSON Web Token (JWT), Blockchain, Web 3.0, Travis CI, MERN Stack

Languages: Deutsch, Englisch
